war and architecture is a timely and moving response by architect lebbeus woods to the bombing of sarajevo with text in both english and croatian accompanied by the author s exquisitely drawn hauntingly beautiful proposals the book is both dedicated and addressed to the citizens of this ravaged city lebbeus woods has long been fascinated by the intimate ties between architecture and violence he identifies the two predominant patterns for rebuilding cities following catastrophic destruction restoring the city exactly to its previous historical state or erasing the remains of the city to construct a new utopia these he argues are twin forms of denial woods draws an analogy to the process of biological and emotional healing presenting

architectural forms that act as injections scabs scars and new tissue within the complex organism of a city only by facing the insanity of willful destruction he argues can reason begin to believe again in itself

this scholarly account of the various ways in which space is configured by power and in which space becomes a resource for power combines insights from social theory politics history and geography

this book was published on the occasion of the exhibition cold war and architecture contributions to austria's democratization after 1945 october 17 2019 february 24 2020 at architekturzentrum wien

the city of homs like so many places in syria has suffered mass destruction since the war began in 2011 so far the architectural response to the crisis has focused on cultural heritage ancient architecture and the external displacement of refugees often neglecting the everyday lives of syrians and the buildings that make up their homes and communities in domicile ammar azzouz uses the notion of the home to address the destruction in cities like homs the displacement of syrian people both externally and internally and to explore how cities can be rebuilt without causing further damage to the communities that live there drawing on interviews with those working in the built environment professions both inside and outside of syria but also syrians from other backgrounds who have become architects in their own way as they were forced to repair and rebuild their homes by themselves domicile offers fresh insight into the role of the architect during time of war and explores how the future reconstruction of cities should mirror the wants and needs the traditions and ways of living of local communities focusing on homs but offering a blueprint for other urban areas of conflict across syria and the wider world the book is essential reading for researchers in architecture urban planning heritage studies and conflict studies

in recent decades the development of advanced weaponry systems and the instant flow of information have redefined the notion of urban warfare as a local phenomenon with global effects in an increasingly interconnected world the annihilation of aleppo and the broadcasted demolitions of palmyra demonstrate the accelerating politicization of the destruction process in this timely volume elisa dainese aleksandar staničić and a broad range of contributors explore the weaponization of architecture targeted attacks on art and infrastructure meant to destroy not only physical structures but also political unity and cultural memory focusing on regions

where planners architects and artists are involved in concrete initiatives on the ground war diaries looks at complex postwar settings to illuminate design responses to urban warfare and violence against the built environment the essays discuss creative strategies for rebuilding and restablizing damaged sites often within the context of continuing animosities the establishment of design coalitions to work with local communities on reconstruction the designing of emergency settlements the development of new and customized strategies for rebuilding diverse parts of the ravaged world and the teaching of culturally sensitive design practices to architects and urbanists among many other topics a much needed contribution to our understanding of postconflict design this volume maps the creative approaches that specialists have used to remediate the effects of violence against cities and cultural heritage

from the targeted demolition of mostar s stari most bridge in 1993 to the physical and social havoc caused by the 2004 boxing day tsunami the history of cities is often a history of destruction and reconstruction but what political and aesthetic criteria should guide us in the rebuilding of cities devastated by war and natural calamities the title of this timely and inspiring new book architects without frontiers points to the potential for architects to play important roles in post war relief and reconstruction by working sans frontières charlesworth suggests that architects and design professionals have a significant opportunity to assist peace making and reconstruction efforts in the period immediately after conflict or disaster when much of the housing hospital educational transport civic and business infrastructure has been destroyed or badly damaged through selected case studies charlesworth examines the role of architects planners urban designers and landscape architects in three cities following conflict beirut nicosia and mostar three cities where the mental and physical scars of violent conflict still remain this book expands the traditional role of the architect from hero to peacemaker and discusses how design educators can stretch their wings to encompass the proliferating agendas and sites of civil unrest

richly illustrated with over 350 photographs plans and engravings this fascinating and unusual book examines the importance of funerary architecture in the development of architectural style it reveals many hidden wonders and beauties throughout the world
