life in the consulting room offers a series of noteworthy vignettes that occurred in the author's consulting room although the context and objective of each consultation varied the decision to present them here is due to a particularly interesting feature of the patient's life or a significant point that arose during their interview with the author many of the

cases have issues of academic interest but these are not pursued here instead these accounts should be seen as portraits snapshots that were considered emotionally interesting and intellectually stimulating some of these patients were in short or long term therapy but most cases were being assessed to determine whether psychotherapy was in fact the best way of helping them no doubt all psychodynamic practitioners will have met some of these findings in their practice but the present book offers a particularly significant collection of clinical episodes

ogden sets out a movement in contemporary psychoanalysis toward a new sensibility reflecting a shift in emphasis from what he calls epistemological psychoanalysis having to do with knowing and understanding to ontological psychoanalysis having to do with being and becoming ogden clinically illustrates his way of dreaming the analytic session and of inventing psychoanalysis with each patient using the works of winnicott and bion he finds a turn in the analytic conception of mind from conceiving of it as a thing a mental apparatus to viewing mind as a living process located in the very act of experiencing ogden closes the volume with discussions of being and becoming that occur in reading the poetry of robert frost and emily dickinson and in the practice of analytic writing this book will be of great interest not only to psychoanalysts and psychotherapists interested in the shift in analytic theory and practice ogden describes but also to those interested in ideas concerning the way the mind and human experiencing are created
